Short Environmental Assessment Form Part 3 Determination of Significance

For every question in Part 2 that was answered "moderate to large impact may occur", or if there is a need to explain why a particular element of the proposed action may or will not result in a significant adverse environmental impact, please complete Part 3. Part 3 should, in sufficient detail, identify the impact, including any measures or design elements that have been included by the project sponsor to avoid or reduce impacts. Part 3 should also explain how the lead agency determined that the impact may or will not be significant. Each potential impact should be assessed considering its setting, probability of occurring, duration, irreversibility, geographic scope and magnitude. Also consider the potential for short-term, long-term and cumulative impacts.

The County is considering foreclosing on tax delinquent property identify by tax parcel no. 019.-06-34 in the Village of North Syracuse and then selling said property to the Village for municipal purposes. The County will not take possession of the property; rather, it will foreclose and then immediately sell the property and transfer title to the Village. The Village must undergo a SEQRA review for any plans it may have for the property in the future. However, the action under consideration is merely the sale of vacant tax delinquent property to the local municipality in accordance with the County Tax Act and GML 72-h. The property owes taxes dating back to 2011. Further, it is worth noting that had the locality not expressed an interest, sale of the property at the upcoming tax auction would be an exempt Type II action.

As such, Onondaga County issues this negative declaration for purposes of Article 8 of the Environmental Conservation Law because the foreclosure and sale is an Unlisted Action which will not result in any significant adverse environmental impacts.

<input type="checkbox"/> Check this box if you have determined, based on the information and analysis above, and any supporting documentation, that the proposed action may result in one or more potentially large or significant adverse impacts and an environmental impact statement is required.
