Clerk

DAVID H. KNAPP
Chairman

KATHERINE FRENCH
Deputy Clerk

WAYS AND MEANS COMMITTEE MINUTES - April 27, 2020
VIRTUAL
TIM BURTIS, CHAIRMAN

AUDIO/VIDEO

MEMBERS PRESENT: Mr. May, Mr. Jordan, Mr. Rowley, Mr. Ryan, Mr. Williams

MEMBERS ABSENT: Mrs. Ervin

ALSO PRESENT: Chairman Knapp, Ms. Kuhn, Mr. Bush, Ms. Abbott-Keenan, Mr. McBride, Dr. Chase, Mrs. Tassone, Mr. Kinne, Mr. Voss, Mr. Donnelly, Mr. Morgan, Mr. Weber, Mr. Kwasnowski, Mr. Durr, Mr. Sexton, Ms. Velasko, Mr. Bolt, Mrs. Maturo, Ms. McNamara, Ms. Lesniak, Mr. DeSantis, Mr. Frantzis, Mrs. French

Chairman Burtis called the meeting to order at 9:31 a.m. *A motion was made by Mr. Jordan, seconded by Mr. Rowley, to waive the reading of the minutes of the proceedings of the previous committee. Passed unanimously; MOTION CARRIED. A motion was made by Mr. Jordan, seconded by Mr. Williams, to approve the minutes of the proceedings of the previous committee. Passed unanimously; MOTION CARRIED.*

1. **TRANSPORTATION:** Marty Voss, Commissioner

a. **BOND RESOLUTION - A Resolution Authorizing Various Bridge Improvement Projects in and for the County of Onondaga, New York, at a Maximum Estimated Cost of \$900,000, and Authorizing the Issuance of \$900,000 Bonds of Said County to Pay Costs Thereof (\$900,000)**

Mr. Voss discussed items 1a and 1b simultaneously:

- Skeleton crew put together work plan; appreciate legislators cooperation and patience
- Bonding at the same level as 2019 - \$8 million between roads (\$7.1 M) and bridges (\$900,000); supports the work plan and begins the process of awarding work to the winning bidder once approved
- Gets contractors back to work; a recovery work plan that supports a lot of jobs
- Paving list provided; item a to support bridges, item b supports roads
- Top-line level review of projects:
- TIP's reduced as part of the forced austerity budget due to what is going on in the world, about \$2 million short
- Anticipate CHIPS to come in at the same level as last year; if able to get more will come back with a proposal
- \$8 million bond supports the local share of federal aid projects, traffic systems management, cold mix, top mix, bridgework, guide rail and other things that have to be replaced
- Work plan just shy of \$23 million

Mr. May:

- Are bond amounts consistent with the plan or are we bonding for more? I want this clear for the record.

Mr. Voss:

- They are less than budgeted and less than we had planned but they are stable from last year.
- Spent considerable time going back and forth; thank Steve Morgan for helping to navigate this to get something accomplished this year, would not have this ready today without Mr. Morgan's personal effort
- Not as aggressive as we had hoped but we are going to keep the ship steady this year

Mr. May:

- We are bonding for the same amount but using less cash. Is that where we pulled back?

Mr. Voss:

- Yes, we pulled back \$2 million cash and are also bonding less than we had planned, but that was all going to be subject to you folks anyway. We are trying to navigate these troubled waters and keep the ship steady so we can keep things moving and get the economy going.

Mr. May:

- It was nice to see the cash in there is year but I totally get it.

Mr. Voss:

- If we had our way everything would be cash every year but that's just(inaudible)

Mr. Rowley:

- For the record, want to ask Mr. Voss if he is aware of anything in terms of federal or state aid in the road work plan that, as a result of the pandemic, would modify these?

Mr. Voss:

- Following closely what is going on with the state budget and through our associations with the NYS Association of County Highway Superintendents, NYSAC and others have been watching what the state budget language is. The dollar amounts we are fairly comfortable with because that is money the state borrows to pay through to us.
- The changes made at the state level are more in terms of process... (inaudible). We are comfortable that we are going to get our project certified, will be able to move things along and be kept whole on these program projects.
- We are hoping there is going to be some sort of federal infrastructure plan that could potentially be really helpful later this fall or early next year; could see big dollars spent locally and we want to maintain our position to be ready to react and spend that.
- Federal aid in our work plan is all approved off of a federal 5-year work plan so that money is there; this is just our ability to draw it down and the resolutions that we have you pass for individual projects are what enable us to contract that money which has already been sequestered off by the Transportation Improvement Program (TIP)

A motion was made by Mr. May, seconded by Mr. Jordan, to approve this item. Passed unanimously; MOTION CARRIED.

b. BOND RESOLUTION - A Resolution Authorizing the Reconstruction of County Roads in and for the County of Onondaga, New York, at a Maximum Estimated Cost of \$7,100,000, and Authorizing the Issuance of \$7,100,000 Bonds of Said County to Pay Costs Thereof (\$7,100,000)

A motion was made by Mr. May, seconded by Mr. Jordan, to approve this item. Passed unanimously; MOTION CARRIED.

c. Amending the 2020 County Budget to Fund in the First Instance 100 Percent of the Federal Aid Eligible Costs at a Maximum Amount of \$400,000 for the Design (Scoping I-VI) and Right-Of-Way Incidentals Phase of the Bear Road (CR 191) Paving Project, PIN 3756.77, and Authorizing the Execution of Agreements (\$400,000)

Mr. Voss:

- Bear Road project design only; probably won't be let until 22 or 23
- Every step of the way have to show legislative approval to spend federal money
- Town of Clay from Sandy Lane to Route 11; village includes sidewalks in the vicinity of the elementary school
- Will be back later for construction

Chairman Knapp:

- This is going to be out a couple of years. Can we apply and get reimbursed for the \$400,000 or do we have to wait until the entire project is done?

Mr. Voss:

- The design money is on the current TIP. Projects take 3 to 5 years to get to construction, this allows us to do the design phase now with real money; can get reimbursed now
- Consultant will do this work; more money toward recovery, get engineering firm moving again

A motion was made by Mr. Jordan, seconded by Mr. Rowley, to approve this item. Passed unanimously; MOTION CARRIED.

d. Amending the 2020 County Budget to Pay in the First Instance 100 Percent of the Federal and State Aid Eligible Costs at a Maximum Amount Of \$3,990,000 for the Construction and Construction Inspection Phases of the Old Route 5 (CR 98) and Warners Road (CR 63) Paving (2R) Project, PIN 3755.69 and Authorizing Execution of Agreements (\$3,990,000)

Mr. Voss:

- West Genesee Street from Wegmans to the 4 corners; final design phase from Westlind up to 173, then down Warners Road to where Coppertop is
- Includes drainage, box culvert at Westlind, sidewalk on the north side of West Genesee Street and the east side of Warners Road within the project

Mr. Ryan:

- Have there been any subsequent conversations about the bridge over the creek on the town road?

Mr. Voss:

- My door is open, there is still time if the Town of Geddes wants to get with us. If they are going to allow the project at the corner of Westlind and Genesee, where the old Hess now Speedway is, we'd be happy to sit and talk with them; told the town engineer that at least three times.
- There is some local concern and opposition to that project; we will forge ahead with our design because we have to in order to meet the federal and state deadlines but, as always, if the Town of Geddes or Camillus wants to see what we are doing and we can find a way to help them get that approved we would be happy to listen and try to work with them.
- Proposal is for a Chase bank to replace a gas station off of West Genesee; very close to the intersection of West Genesee and Westlind, would love to see that addressed but the solution the developer came up with includes a bridge over Geddes Brook and there is some opposition
- Not telling the town what to do; happy to work with them if they want to find a creative solution so that they can do the bank project

Mr. Ryan:

- We are under a deadline to meet state deadlines. Any conversation has to be had now, right?

Mr. Voss:

- Yes, the sooner the better.
- On the borderline of Camillus and Geddes so there are some intermunicipal discussions; we're not really involved in the planning, willing to work with anyone to make it safer and more efficient for transportation on the state and county road there

A motion was made by Mr. Ryan, seconded by Mr. Rowley, to approve this item. Passed unanimously; MOTION CARRIED.

e. Amending The 2020 County Budget to Pay in the First Instance 100 Percent of the Federal and State Aid Eligible Costs at a Maximum Amount of \$665,000 for the Construction and Construction Inspection Phases of the Tully Farms Road Bridge Project, PIN 3755.24, and Authorizing Execution of Agreements (\$665,000)

Mr. Voss:

- Tully Farms Road bridge over Onondaga Creek in Lafayette
- Project designed, ready to go; will work with the school district to coordinate timelines and bus routes when the time comes

Chairman Knapp:

- What is the plan for rush hour traffic?

Mr. Voss:

- We will work out a traffic control plan with the town and school district that everyone can live with...(inaudible), may have to wait 10 or 11 seconds to let someone cross while doing one side

A motion was made by Mr. May, seconded by Mr. Ryan, to approve this item. Passed unanimously; MOTION CARRIED.

2. SYRACUSE/ONONDAGA COUNTY PLANNING AGENCY: Dan Kwasnowski, Director

a. Calling for a Public Hearing on the Proposed Inclusion of Viable Agricultural Lands Within Certified Agricultural Districts Pursuant to Section 303-B of the New York State Agriculture and Markets Law

Chairman Knapp addressed items 2a and 2b simultaneously:

- 2a is annual additions to ag districts within the county
- District 2 up for renewal this year, can only remove properties when the district is up for renewal
- 2a calling for a public hearing on additions outside of District 2
- Leader May is on the Farmland Protection Board and may want to comment

Mr. May:

- Another really good process this year; think the committee did a fantastic job vetting each of the requests both for this and the next item, not every request made it in
- The committee is doing its work and doing a great job along the way, these are good recommendations for the ag district

Mr. Kwasnowski:

- Both items are for public hearings; will be back next month for the actual adds and removals

A motion was made by Mr. May, seconded by Mr. Jordan, to approve item 2a. Passed unanimously; MOTION CARRIED.

b. Calling for a Public Hearing for Renewal of Agricultural District No. 2, Towns of Marcellus, Skaneateles and Spafford

A motion was made by Mr. May, seconded by Mr. Williams, to approve item 2b. Passed unanimously; MOTION CARRIED.

3. **EMERGENCY COMMUNICATIONS:** Brain Donnelly, Deputy County Executive
a. **Authorizing a License Agreement with the New York State Office of Parks, Recreation and Historic Preservation for the Use of the Pompey Radio Tower Site**

Mr. Donnelly:

- Agreement with NYS parks and the county allows for use of unutilized portions of the tower at the Pompey radio tower site
- Annual compensation of \$3,000, will increase by 3% during the life of the agreement
- 911 has done this before with other entities; no impact on the county's utilization of the towers

Mr. Jordan:

- How long is the agreement?

Mr. Donnelly:

- Believe it is 3 years.

A motion was made by Mr. Rowley, seconded by Mr. Jordan, to approve this item. Passed unanimously; MOTION CARRIED.

4. **ONONDAGA COUNTY RESOURCE RECOVERY AGENCY:**
a. **Resolution Urging New York State Legislature to Increase Recycling and Reduce Municipal Waste Management Costs by Expanding the NYS Returnable Container Act (Sponsored by Mr. Knapp)**

Chairman Knapp:

- Memorializing resolution urging NYS to change recycling rules to include wine and liquor bottles as part of the 5 cent deposit bill
- Currently goes into the regular recycling stream, very difficult to handle when trying to sort, often breaks, makes sorting and handling difficult
- Ms. Glance talked to the Environmental Protection Committee about this and asked for his sponsorship of this resolution; adding this material to the returnables so that they can be properly handled just like glass beer bottles and things such as this that they are very good at handling
- No financial impact to the county; would give revenue to the state

Mr. Jordan asked to co-sponsor this resolution.

Mr. Jordan:

- It would be really beneficial in terms of our recycling efforts; wine and liquor bottles can be recycled almost endlessly but they end up in the normal stream of refuse recycling and contaminate other aspects of our recycling program that decreases the efficacy of recycling of our glass products.
- Some don't like paying the deposit but you get it back when returned; will be beneficial to the county as a whole

Ms. Kuhn and Mr. Kinne asked to co-sponsor as well.

Mr. Kinne:

- Know it is not up to us but believe Ms. Glance is looking for more than a nickel deposit

Chairman Burtis and Dr. Chase asked to cosponsor also.

A motion was made by Mr. Jordan, seconded by Mr. Ryan, to approve this item. Passed unanimously; MOTION CARRIED.

5. **COUNTY LEGISLATURE:** Debbie Maturo, Clerk
a. **Standard Work Day and Reporting Resolution**

Mrs. Maturo:

- Next round of standard workday and reporting resolution, required by the state
- Captured as many as possible this month per compliance; will have another next month and probably the month out

Mr. Rowley:

- How often does this have to be done?

Mrs. Maturo:

- A 3-month record of activities (ROA) is good for 8 years as long as it's a clear depiction of your duties and responsibilities; have to do a new one if your job changes or if duties change significantly
- RS 2419 form can be submitted for every term; form solidifies that the ROA submitted on the last entry is sufficient

A motion was made by Mr. Jordan, seconded by Mr. Williams, to approve this item. Passed unanimously; MOTION CARRIED.

6. **FINANCE – REAL PROPERTY TAX SERVICES:** Don Weber, Real Property Tax Director
a. **Approving and Directing the Correction of Certain Errors on Tax Bills**

Mr. Weber:

- Correcting one property in Clay, overbilled significantly for county sewer based on water usage
- WEP directed correction of the tax bill, down from \$81,000 to just under \$12,000
- Money not going away; will get from the correct person

Mr. Rowley:

- Do you know how this happened? In 2019 the property had 1 unit and then in 2020 WEP came up with 154 units. It just seems really strange.

Mr. Donnelly:

- As you know, it is based on water usage and WEP does their best to line up water meters with the property tax map numbers. This is not a one to one relationship, think they spend a lot of time trying to marry OCWA's data set to our property tax data set to figure out which tax parcels are actually using these. Sometimes that gets a little tough. We occasionally have these corrections where they put the charge on the wrong property.

Mr. Rowley:

- For the record, I want to express my concern with this process. We spend hundreds of millions of dollars in WEP and I am not confident that the way we access units and the way we review how units are allocated to properties on a regular basis is done well.
- Asked the county comptroller to weigh in on this and maybe do an audit on this; for the record, I think he should do that
- Should have a tighter system in terms of how you allocate sewer units to properties to make sure they are done correctly... (*inaudible*).

A motion was made by Mr. Rowley, seconded by Mr. May, to approve this item. Passed unanimously; MOTION CARRIED.

7. **STEAM SCHOOL:** Brian Donnelly, Deputy County Executive

a. BOND RESOLUTION - A Resolution Authorizing the Renovation of the Former Central High School for Use as A STEAM High School in and for the County of Onondaga, New York, at a Maximum Estimated Cost of \$74,000,000, and Authorizing the Issuance of \$74,000,000 Bonds of Said County to Pay Costs Thereof (\$74,000,000) (Sponsored by Mr. Knapp)

Chairman Burtis discussed items 7a and 7b simultaneously:

- Do not intend to take a vote on these items today, will have a discussion; would be great to have two bites at this
- Currently don't have the contract from law and the city attorneys; makes it difficult to have a full conversation and then have a full understanding in a place to be ready to vote
- Have known this has been coming but it did come quickly and in my opinion, there is more work to be done

Mr. Donnelly:

- My apology ... (*inaudible*); individual in the city negotiating this had a significant family emergency to deal with last week; hope to have it to you as soon as is humanly possible this week
- From an overview perspective, the state legislature approved the STEAM school in the budget; the city school district is working with the state board of education on the reimbursement
- Reimbursement level will be at \$74 million, the project budget; won't exceed \$74 million from a project perspective, will use that as our number and back into that through the design process
- Won't let it go higher, no intention to come back to this legislature for more funding at any point during this process
- The lease is not finalized but very close; protections in the lease ensure the county is held harmless in this process
- As part of the legislation, establish a relationship with the school district and SUNY ... (*inaudible*) will be an adult component but all adult learning will be handled at night
- Mr. Morgan has information about debt service; happy to entertain any questions

Mr. Jordan:

- 7b refers to the city agreeing to repay the county in full for all debt service on the bonds. Initially, this will be sort of a lease arrangement. What about repairs, operating costs and things of that sort; is the city assuming all of those costs as well?

Mr. Donnelly:

- Yes, the county's responsibility will be to bond for this and ultimately we will be the lead in the construction. After that point, outfitting any repairs going forward during the term of the lease would fall to the City of Syracuse and the school district.

Mr. Jordan:

- All expenses are essentially going to be picked up by the city. They will reimburse us for bond payments and any other costs or expenses will be solely the responsibility of the City of Syracuse.

Mr. Donnelly:

- Correct

Mr. Jordan:

- What guarantees do we have, or could we have, that the state will not come back and cut back on this project because they have a shortfall due to the coronavirus?

Mr. Donnelly:

- A couple of things to take as a positive:

- Approved in the budget during the coronavirus pandemic; they were aware of the financial situation they are facing, still approved this and made it a priority in the state budget
- Lease payments to the school district will not begin until they take occupancy which we anticipate will be 24 months, at that point in time being that this will be bonded money through the state education department we are confident that there won't be any impact from corona at that point

Mr. Jordan:

- Whether coronavirus or some other financial difficulty or impact is there any way to guarantee that there is no way future legislatures or governors will not cut back, rescind or effect what would otherwise be the normal payment towards their share of the costs of this?

Mr. Donnelly:

- I cannot give you an absolute guarantee. We go out on faith for federal aid construction projects for highways from the federal government and state. This is capital funds from NYS so I would say it is more secure than potential operating budget cutbacks.
- I have heard nothing from the state that there are any concerns about this is not moving on.

Mr. Rowley:

- What will the term of the lease be?

Mr. Donnelly:

- It is my understanding that the state will reimburse the school district over 15 years; not 100% positive on that. Whatever the term of reimbursement is will likely be the term of the lease and the term of our debt service.

Mr. Rowley:

- Will we or the school district own the building?

Mr. Donnelly:

- We will own the building for the purposes of constructing it and through the term of the lease. At the end of the lease, it will be returned to the city and the school district.

Mr. Rowley:

- Within the lease it will spell out that the operating costs are on the school district to pay; will that include insurance costs on the building?

Mr. Donnelly:

- I believe so; will check on it and get back

Mr. Rowley:

- The details in the architect's design included in our packet seemed like a lot more than \$74 million. Are there any numbers to that conceptual budget analysis that we can see? My feeling is what they want is going to cost a lot more than what we have agreed to bond for.

Mr. Donnelly:

- Yes there are; will see about getting a summary over to you
- Asked Hueber-Breuer to review, from a conceptual standpoint, the potential cost of the project; certainly want to be in a situation to make sure that we can match that
- They looked at it from the standpoint of what will be necessary to make this a modern school in as much as you can in a historic building, address ADA, roofing, electrical, mechanical, and plumbing concerns. They came up with a figure with inflation just shy of \$74 million.
- We are confident but at the end of the day, \$74 million is the number. If for any reason during the design process it started creeping beyond that we would work with the school.... (*inaudible*) to trim back what we are doing in the building to make sure that it meets the budget.

Mr. Rowley:

- Will the school district be responsible for BAN interest as well?

Mr. Morgan:

- If we issue BANs, they will be responsible for all costs associated with financing the project.

Mr. Rowley:

- Do we know, particularly on the school district side, if we have financial advisors involved that will project cash flow, debt service, and what the state aid will be on this? Have we gotten any of those types of calculations from the school district in terms of what their state aid is going to be and how it might flow?

Mr. Morgan:

- We have preliminary estimations and calculations from Susan Slack, CFO, for the school District.

- They started working with their advisors to solidify those numbers but the initial estimation, again from the reimbursement perspective, with the double MCA reimbursement you are looking at just shy of \$74 million; for those resources and processes will be fully engaging with the school district since they have the experience and knowledge in this area; will lean heavily with our partners to ensure that this project moves forward in the mold and the process that has been out there for years.

Mr. Rowley:

- I think that the agreement will speak to it; just want to make sure that we are covered.

Mr. Rowley:

- Resolution b includes both the lease agreement and SEQRA resolution; agree with Leader May's previous comments that those types of things should be separated and going forward would like to see those separated as well.

Chairman Burtis:

- Limiting comments to Ways and Means members
- Should continue discussions - have SEQRA, design, and a lot of information to look at and consider
- Appreciate conversations had with committee members and the work being done; hopeful we can get the contract soon and have some conversation

Mr. Rowley:

- Chairman Burtis said he wanted to take a couple of bites at the apple; will this be going to County Facilities Committee or to the floor?

Chairman Knapp:

- Given the personal situation of the city attorney, we are going to wait and see what the status of that is. If we can get that in soon we will see what it has to say and what questions it brings up
- We can't vote on it if we don't have it - more to follow on that

Mr. Rowley:

- Encourage it to go to the facilities committee once the agreement comes out so that we have an option to ask more questions on the agreement even if we get the agreement before session

Chairman Knapp:

- I appreciate your thoughts.

Mr. May:

- Was having technical difficulties and want to get a couple of comments in and clarification; Mr. Donnelly's comments were not coming through very clearly
- Following Legislator Jordan's line of questioning, did Mr. Donnelly say that the city or the school district will be responsible for the maintenance and repairs of this building?

Mr. Donnelly:

- Ultimately it would fall to the school but as they are a financially dependent school district they are backed by the City of Syracuse.

Mr. May:

- Think Mr. Donnelly said he is confident corona will not be an issue in 24 months. What is the bases of that, and is there something in the contract that gives us any kind of assurance or protection along those lines?
- Know we will see the contract eventually; think Mr. Jordan was on a good track, want to make sure we are being thorough with that questioning

Mr. Donnelly:

- Let me clarify, I don't have a crystal ball. I am very much hopeful, as all of us are, that we are not in a situation where corona is a daily impact. My point was that the reimbursements from NYS will not start flowing until the school district takes occupancy of the building. That is anticipated to be at 24 months. Certainly, I hope that within 24 months this is not an issue for the state from a financial perspective. From a comfort level, because this is not going to come out of state operating, it will be bonded funds I am more comfortable from that perspective as to if it were included in operational funds for the 2020-2021 state budget.

Mr. May:

- Thank Legislator Rowley for bringing it up, was intending to do the same, echo the comment that we should bifurcate item b and pull the lease out separate from SEQRA determinations

Mr. Jordan:

- The school is supposed to be handling the entire costs for bonding but if they don't take possession for 24 months when will our bond payments begin and if it is before the 24 months how is the city going to be reimbursing us for payments made in the interim?

Mr. Donnelly:

- From a cash flow perspective I couldn't say for sure exactly when we are going to bond; leave that to Mr. Morgan based on what our existing cash flow is

- If we need short term financing during the project itself for any reason, if we decided to hold off and do BANs for any reason rather than bonds until the end the financing costs would be the responsibility of the school district

Mr. Jordan:

- Are they going to be retroactively reimbursing us for the payments we've made before them taking possession?

Mr. Donnelly:

- That is how I would envision it; there could be a period in there between when we fiancé versus when occupancy happens

Mr. Morgan:

- We will look to borrow money; a lot of it will depend on getting this approval and then the city and city school district updating the construction plan
- Based on what I am seeing, I don't think we will be looking to borrow money until next year which then would push the first payment, which would be the interest-only into the following year
- How the work program and the construction timeline lines up will determine if we skip the BAN process and go right to just issuing bonds; if we issue bonds or BANs this year an interest payment will become due before they take occupancy and we will have to fund that until occupancy is taken

Mr. Jordan:

- How would reimbursement occur if the reimbursement is essentially coming from the lease payments and they haven't taken possession yet, how would there be a retroactive reimbursement; what would be the vehicle for doing that?

Mr. Morgan:

- The lease payment is going to equal the debt service of the debt we issue. The timing will not lineup exactly but the agreement will ensure that the lease payments over the 15 year period will include the entirety of the costs of the county.

Mr. Jordan:

- To encapsulate let's say the total debt service cost, including interest, is \$100 million then the lease payments would be \$100 million divided by the number of months 15 years amounts to, this is essentially how the debt service would work out?

Mr. Morgan:

- Correct but there is going to be a timing issue. We may very well have to pay a little bit on the debt service before we start getting the lease payments in but ultimately that 15-year lease will encompass the total costs to the county.

Chairman Burtis:

- Still keeping questions and comments to members of Ways and Means; if there are other questions or comments feel free to email me or the correct person in the administration to get your questions answered
- Appreciate everybody being here and the good questions and comments

Mr. Ryan:

- What is the construction phase?

Mr. Donnelly:

- It is anticipated it will be approximately 24 months including a design phase.

No action was taken on this item.

b. Regarding the Steam School: Authorizing the Execution of Agreements Including Acquisition, Lease and Renovation of the Steam School; Approving the Classification of a Type I Action Under the State Environmental Quality Review Act; Accepting the Environmental Assessment Form; Accepting and Adopting the Negative Declaration; and Authorizing the Filing, Distribution and Publication of the Negative Declaration (Sponsored by Mr. Knapp)

No action was taken on this item.

A motion was made by Mr. Jordan, seconded by Mr. May, to adjourn the meeting. MOTION CARRIED.

The meeting adjourned at 10:39 a.m.

Respectfully submitted,

KATHERINE M. FRENCH, Deputy Clerk
Onondaga County Legislature
