Dear County Executive McMahon & Onondaga County Legislators,

We see daily news headlines about federal spending cuts and are concerned about what they mean for Onondaga County. We are writing to request an in person town hall for constituents to be able to express their concerns, ask questions and hear directly from our local leaders.

Onondaga County receives over \$142 million in federal aid in 2025 to support our health department, social services, children & family services, adult & long-term care, Onondaga Community College and more. What will happen to these services and departments if their budgets are cut?

With the loss of federal and non-profit jobs, will Onondaga County need to increase the services it provides to residents? Is Onondaga County prepared for this?

These questions and more are being asked by residents. Please hold an open town hall so the community's concerns can be addressed.

We look forward to hearing from you.

Thank you.

Good afternoon, I am Elaine Denton and I live in the Town of Manlius. I am here today to ask you to vote no on giving OCIDA another \$27 million dollars of taxpayers money to buy land for private companies. There is a lot to do to prepare for Micron. From building housing, replacing & upgrading water pipes, roads, drainage infrastructure, workforce training, and more. After decades of neglect, we need to catch up and get our community ready. We need to focus on what our residents need.

The only way this historic investment in CNY works is if the residents of Onondaga County are taken care of. We need clean, healthy water to drink, safe, affordable housing to live in, reliable transportation to jobs that are already here, affordable childcare and a sustainable environment.

There are so many ways \$27 million could help our community. It could be used to build 3 bedroom apartments that are sorely lacking in Onondaga County. If the county can spend over \$100 million dollars to build an aquarium for fish, we should be able to fill this need and build family friendly apartments helping with family homelessness.

Or let's send checks to the over 60,000 residents living in poverty in Onondaga County. We saw how stimulus payments lifted millions out of poverty during the pandemic. Let's actually reduce poverty in our community. Stimulus money stays right here in our community because people use it to pay for living expenses. Onondaga County did this in 2022 sending seniors a one time check of \$200.

My point is there are more important issues to use this money for than being a real estate company for businesses. We have resources to help companies locate here without having to buy their property for them. We need to take care of our residents which will in turn attract more people and businesses.

Let's remember the report of the economic impact New York State completed in 2022 which reported one of the biggest categories for new jobs will be government jobs. Local and state governments will employ as many as Micron suppliers. We can't keep giving tax breaks and taxpayer's money out without returns because we are going to need it to fund future jobs and services.

Giving \$27 million dollars out with no metrics for success and no details on if, when or how taxpayers will be paid back does not make sense. Let's learn from our past mistakes and let's put this money into our community not corporations, please vote no.

Thank you.

Elaine Denton

Shirley Griffin, Los Angeles/California

I oppose both the \$27 million to make sites "shovel-ready" for Micron to build its semiconductors and I oppose the \$33 million for acquiring land for semiconductor factories. Stop wasting tax money on subsidies to bring factories to Onondaga County. Upstate NY has a broken medical system. You are bringing ridicule to both NY State and the entire USA by subsidizing large corporations to build semiconductor chips in Onondaga County! The entire world is laughing because of the waste of money by your local government for the semiconductors. You should be spending your tax money to improve medical care instead. Most people in Upstate NY are suffering due to lack of decent medical care. The hospitals and medical facilities in Syracuse are even worse than what we have in Los Angeles County. It's silly that so much is spent to entice Micron to come to Onondaga County. It's also disgraceful that not enough money has been spent to clean up Lake Onondaga, one of the most polluted lakes in the world! I have been to Syracuse and saw how awful the living conditions are. Syracuse has more pollution and crummy medical facilities than Los Angeles has.

I don't want \$27 million to be spent buying land for the semiconductor factories. I also don't want to have any tax dollars spent until a Draft Environmental Impact Statement (DEIS) is released regarding the proposed semiconductor factories being built with taxpayer subsidies. Micron is already a wealthy company that could easily afford to purchase the land it needs to build semiconductors. No more subsidies should be given to Micron.

\$27 million of our taxpayer money to give to OCIDA to purchase more property for corporations. OCIDA has already spent more than [\\$30 million](#) of taxpayer money buying land for Micron. This is currently tied to amending the 2025 county budget giving \$5 million for the county's housing initiative program and \$1 million for using AI to support county operations.

These proposals should at least be separated to be voted on individually. With the highest concentration of poverty in the country, Our families can't afford a place to live, there are much better uses for this money then corporate subsidies.

another "gift" to Micron

We have lived in Onondaga County since 1969 and at our current residence in the Town of Lysander since 1976. We fail to understand the reasons for the current proposal to give the Micron project another gift of public funds, especially when that money is sorely needed for other purposes in our county, including severe shortages of adequate housing. Our concerns are well expressed by Legislator Maurice Brown in his recent letter to the editor, copied below.

"On May 6, the Onondaga County Legislature is scheduled to vote on spending \$33 million to [buy land for future development](#), including \$27 million to make sites "shovel-ready" for [Micron](#) suppliers and other manufacturers. I will be voting no.

This vote comes while the county [refuses to release](#) a taxpayer-funded report assessing Micron's potential impacts. Public record experts agree it should be made public. Yet this isn't new — just last month, the Legislature removed transparency requirements from the \$100 million aquarium project, making it harder for residents to track how their money is spent.

We are falling into a dangerous pattern: spending first, asking questions later. That's unacceptable when hundreds of millions of public dollars are at stake.

The legislature should not approve any new money tied to Micron or its suppliers until the Draft Environmental Impact Statement (DEIS) is released and the public has had a chance to review it.

I urge concerned residents to submit public comments opposing this \$27 million request by emailing onondagacountylegislature@ongov.net with "Public Comment" in the subject line and including your name and town in the email.

Yet again, residents are told to blindly trust county government decisions while basic transparency is withheld. That's not how public service is supposed to work. Taxpayers deserve full information — not empty promises. Legislators must stop asking for trust they haven't earned and start delivering real accountability.

Maurice Brown"

To Office of the Onondaga County Legislature <onondagacountylegislature@ongov.net>

NOTICE: This email originated from outside of Onondaga County's email system. Use caution with links and attachments.

I would like to express deep concern regarding the lack of transparency surrounding the Micron project, particularly the withholding of the full economic impact report, and the continued tax payers dollars being spent without full transparency, or public input.

This report, funded by public dollars, is crucial for our community to understand the potential benefits and challenges of this significant investment.

While the Micron project promises substantial economic growth, including the creation of nearly 50,000 jobs statewide and a \$100 billion investment over the next two decades, the community deserves full access to all information to assess the project's implications comprehensively.

County Executive Ryan McMahon has emphasized the transformative potential of this initiative, referring to it as "our generation's Erie Canal moment". However, transparency is essential to ensure that such a monumental project truly benefits all residents. We know transparency is not something Ryan McMahon likes to participate in.

The Editorial Board of Syracuse.com even stated "The county's tight timetable appears to be designed to limit public participation and thus limit public input and opposition. This will energize the opposition, not neutralize it. It also has the potential to delay the project even more, if the county is pressured to extend the public comment period beyond 45 days."

The decision to withhold the economic impact report increasingly raises questions about the administration's commitment to open governance. Especially after the decision to spend over \$85 million for an Aquarium without allowing public input. Public trust is built through transparency, and withholding information undermines that trust.

Moreover, past actions, such as the use of federal ARPA funds for a video promoting the Micron project—which some viewed as a campaign ad—further highlight concerns about the administration's transparency.

I urge the Legislature to advocate for the immediate release of the full economic impact report prior to any vote for more taxpayer money into this project. Our community has the right to be fully informed about projects that will shape our region's future. Whether or not Ryan McMahon and those who rubber stamp his agenda agree.

Transparency is not just a principle; it's a necessity for democratic governance. Let us ensure that the Micron project proceeds with the full confidence and support of the community it aims to serve.

Thank you for your attention.
