

## Appendix E-1

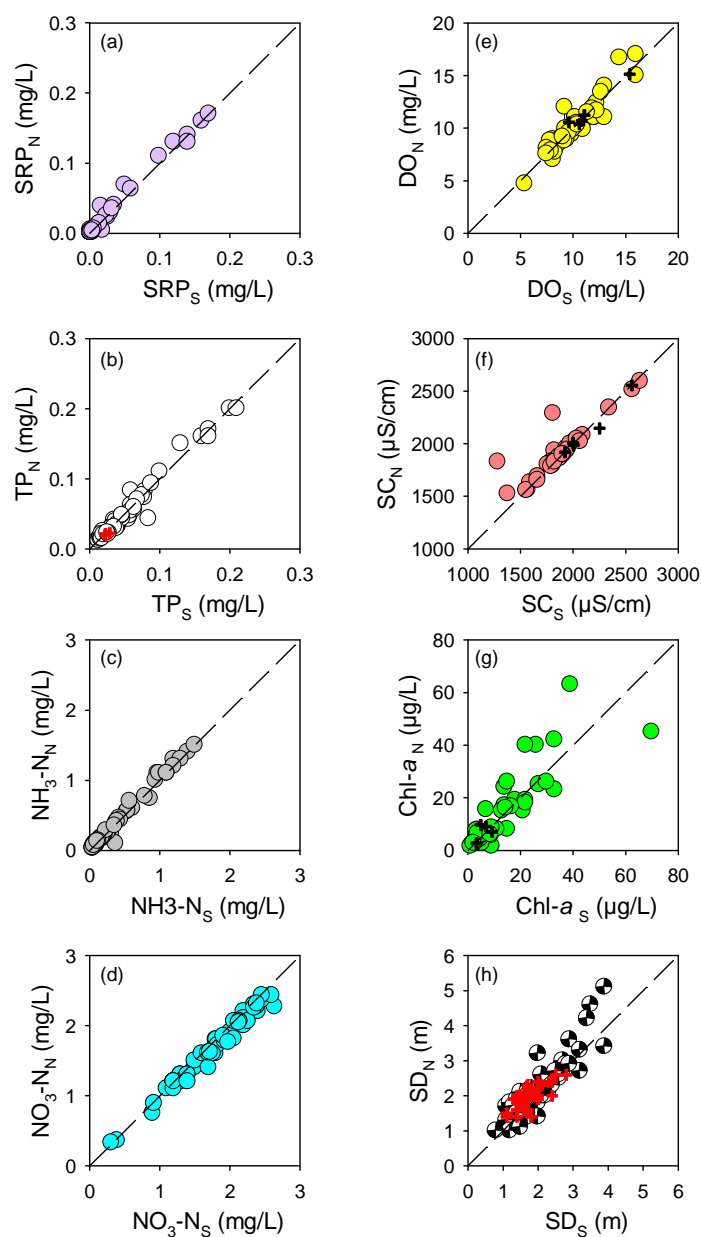

Figure E-1. Comparison of paired North Deep and South Deep upper water values for selected parameters: (a) soluble reactive phosphorus (SRP), (b) total phosphorus (TP), (c) ammonia (NH<sub>3</sub>-N), (d) nitrate (NO<sub>3</sub>), (e) dissolved oxygen (DO), (f) specific conductance (SC), (g) chlorophyll-a (Chl-a), and (h) Secchi disk (SD). Paired measurements from 1999-2012 and 2013 are identified with circles and plus signs, respectively.

## Appendix E-1

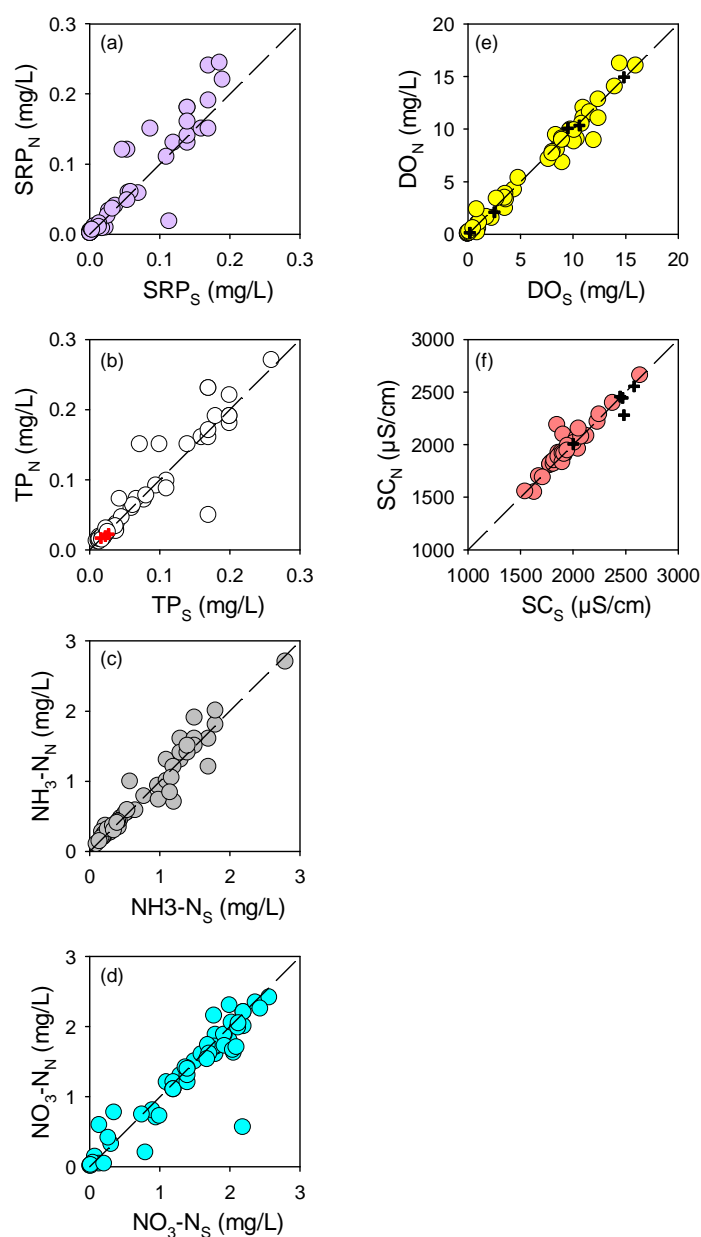

Figure E-2. Comparison of paired North Deep and South Deep lower water values for selected parameters: (a) soluble reactive phosphorus (SRP), (b) total phosphorus (TP), (c) ammonia (NH<sub>3</sub>-N), (d) nitrate (NO<sub>3</sub>), (e) dissolved oxygen (DO), and (f) specific conductance (SC). Paired measurements from 1999-2012 and 2013 are identified with circles and plus signs, respectively.
